

QUALITY POLICY

Indofil Industries Ltd. aims to be a leading global leader in crop care and specialty chemicals with focus on growth through new markets and product portfolio expansion.

Key strategy of the company is to exploit the full potential of B2B and B2C businesses in national and international markets through organic & inorganic growth, innovative products and world class operations coupled with leverage of digital technology and being a future ready organization with respect to people and processes.

With commitment to maximize customer satisfaction by understanding and exceeding customers' stated and unstated needs, the organization will strive for excellence in design, manufacturing, distribution and marketing of products by implementation of processes across value chain to ensure supply of quality products and best customer services while conforming to the regulatory requirements of the country in which it operates.

R&D Lab will contribute to company's growth through innovative, environment friendly and superior technology products of highest quality standard in response to ever changing market needs and progress towards sustainable future.

To enhance competitive advantage and to achieve sustainable growth, the organization shall establish, monitor, measure and continually improve the effectiveness of the quality management system and related performance indicators through adoption of process approach, evidence-based decision making and risk based thinking in order to achieve planned results.

People being its strength, identifying and developing talent through training and skill development to cater to the growing needs of the organization will be a major initiative for business growth.
